

**National Interagency Coordination Center
Incident Management Situation Report
Friday, November 9, 2007 – 0530 MST
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (118 new fires)
 New large fires: 0 (*)
 Large fires contained: 3
 Uncontained large fires: 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0
 Fire Use Teams committed: 0

** Uncontained large fires do not include WFU or confine/contain incidents. **

This will be the last daily Incident Management Situation Report. This report will be posted every Friday unless significant activity occurs.

Southern California Area (PL 3)

New fires: 12
 New large fires: 0
 Uncontained large fires: 0
 Type 2 IMTs committed: 2

UNEXPLODED ORDNANCE

Recognizing unexploded ordnance (UXO) is the first and most important step in reducing the risk of injury or death. UXO poses risk of injury or death to anyone in the vicinity. Safety measures include:

- If you see UXO, stop. Do not move closer.
- Never remove anything near UXO.
- Clearly mark the UXO area with flagging, etc.
- Keep a minimum of 500 feet away from any UXO that is on fire.
- Report discovery of UXO to your immediate supervisor and/or dispatch.
- The following types of UXO may be encountered on military, former military and non-military sites:
 - Small arms munitions
 - Guided missiles
 - Rifle grenades
 - Rockets
 - Projectiles
 - Mortars
 - Bombs
 - Hand grenades
 - Projected grenades
 - Dynamite
- UXO may be found fully intact or in fragments. All UXO, whether intact or in fragments, presents a potential hazard.
- Deteriorated UXO presents a particular hazard because it may contain chemical agents that become exposed.
